

# X14

## Tiltrotator 10-14 tonnes

---

### A tiltrotator for midsized excavators between 10 and 14 tonnes

The Steelwrist X14 tiltrotator is designed to deliver the power and versatility that is a must for midsized excavators. Our tiltrotators have a low building height, high tilt angle and an unbeatable relationship between strength and weight thanks to steel cast components.

#### The tiltrotator brings versatility to the excavator in small to big tasks

With a midsized excavator you can take on projects of varying sizes, from small scale landscaping tasks to roadwork or foundation work on construction sites. The X14 tiltrotator enhances the efficiency of the excavator as it enables you to rotate a work tool 360 degrees and tilt 45 degrees in each direction, with top of the class precision and controllability. This facilitates your work and makes you flexible to take on a variety of challenging new jobs.

Steelwrist quick couplers and tiltrotators follow the symmetrical standard (S-standard), the fastest growing coupler type internationally. The attachment coupler on the tiltrotator has Front Pin Lock (FPL) safety solution, a mechanical lock of the front shaft which significantly limits the risk of an unintended drop of work tools. The tiltrotator is delivered with a control system that fits your excavator regardless if you need a two or four hose solution.

With a tiltrotator that has high flow hydraulics you will be able to use the tiltrotator in a more fuel efficient way and it allows for efficient use of high flow work tools. A robust and easily calibrated Absolute Rotation sensor in the high flow swivel gives high accuracy data to Machine Control Systems.

#### Steelwrist SQ auto connection system and the Open-S standard

Steelwrist SQ is our high performing automatic oil connection technology used to easily change and connect hydraulic work tools on the excavator. All SQ products comply with the Open-S standard. This means that the SQ system is designed to be able to connect to other brands following the Open-S standard. S-type tiltrotators (from S50 and up) are upgradeable to SQ-type at a later stage.

#### Control system

Steelwrist supply two types of tiltrotator control systems. Quantum is an advanced control system where ergonomics, easy installation and fuel efficiency, remote support and automatic tool recognition are important parts of the system. The four hose proportional machine control is the more basic system.

#### Gripper cassette (option)

Equip the tiltrotator with a gripper cassette with a finger gripper that will make your excavator even more flexible, handling objects with precision. The gripper cassette can be retrofitted.

#### Central lubrication (option)

Our tiltrotators can be equipped directly from factory with central lubrication that fits all central lubrication systems on the market.

## 🌀 Technical specification

Tiltrotator	X14	X14	X14	X14	X14	X14
Machine Interface	S45	S50	SQ50	DF	DF	DF
Tiltrotator Quick Coupler	S45	S50	SQ50	S45	S50	SQ50
Machine weight [ton]	10-14	10-14	10-14	10-14	10-14	10-14
Max Breakout torque [kNm]	80	80	80	80	80	80
Weight from [kg]	300	300	300	300	300	300
Building height [mm]	455	455	455	528	528	528
Length [mm]	724	724	724	776	776	776
Cylinder width [mm]	685	685	685	773	773	773
Max tilt angle [degrees]	±45	±45	±45	±45	±45	±45
Max width dipper arm [mm]	-	-	-	272	272	272
Pin diameter [mm]	-	-	-	40-60	40-60	40-60
Pin distance [cc-measure ] [mm]	-	-	-	240-425	240-425	240-425
Tilt Torque [kNm]	36	36	36	36	36	36
Rotational Torque [kNm]	7,8	7,8	7,8	7,8	7,8	7,8
Hydraulic AUX with gripper	1	1	1	1	1	1
Hydraulic AUX without gripper	2	2	2	2	2	2
Lifting hook [ton]	-	-	-	5	5	5
Oil Flow [l/min]	94	94	94	94	94	94
Max pressure [bar]	210	210	210	210	210	210
Max Pressure Separate AUX [bar]	350	350	350	350	350	350
Safety solution	FPL	FPL	FPL	FPL	FPL	FPL

# Work tools and Open-S – the world industry standard for fully automatic quick couplers

The Symmetrical Quick Coupler standard for excavators (the S-Standard) is an industry standard that was originally defined in 2006 by the Swedish Trade Association for Suppliers of Mobile Machines.

The Symmetrical standard, which is an open standard not controlled by one specific manufacturer, has since its inception grown to become a well-known coupler standard on the international market. The demand for quick couplers with integrated hydraulic couplings and electrical connectors, so called Fully Automatic Quick Couplers continue to grow.

In order to achieve interchangeability the request for a standardized and well-defined interface is therefore apparent.

As fully Automatic Quick Couplers have more intricate functions than a standard Mechanical Quick Coupler it is crucial that also non hydraulic work tools include certain features such as hardened shafts and cover plates etc. The purpose of this document is to define the technical dimensions for mechanical (non fully hydraulic) work tools to be used with Open-S Quick Couplers.

OPEN-S DIMENSIONS FOR BUCKET ATTACHMENT FRAME AND COVER

	L1 Width	L2 C. Width	L3 C-C	L4	L5 Thickn.	L6 Tol. area	L7 Tol. area	L8 Hardening	M1 Shaft D	M2 Radius	M3 Tol Area	M4	N1	N2	N3	N4 Offset	N5 Width	N6 Rec Th.	N7 Radius
